

Token Listing Guidelines

How to submit a token listing request on the DEX

To submit a new token listing request, please go to “List Token” menu and then “Apply Here” option. And then just fill out the form and we will process it in a short while. we would like you to know that we currently only support **Ethereum-based Tokens** (currently ERC-20, more options coming soon).

Token and project guidelines

In order for your token to be accepted make show you have the following

- **Token Code**

Token contract should be verified on etherscan.io

Token code should be secure and able to be safely transferred using our Ox settlement layer

The token should have users (distribution done)

The economics of the Token should make sense (whitepaper link required)

- **Project Community**

The project should have a list of followers therefore we require a link to the project’s social media pages, e.g. Telegram, Facebook, twitter

- **Team and Advisers**

To better ensure professionalism and potential in the project links to advisors is required.

After submitting the listing request

After you submit the listing request, there are two possibilities:

1. Your token listing application is accepted
2. Your token listing application is not accepted at this time

1 - If your token listing application is accepted, we will contact you by email provided in the listing request form. Typically we respond within a few business days.

2 - Due to the extremely high volume of token listing applications, we do not respond to every listing request. **If you do not hear back from our team within a week of submission, then your project did not meet the above listing guidelines.**

Thanks for applying to list with us.
